

Reliable

Your company will enjoy the features and benefits of a state-of-the-art digital phone solution.

- sipVine's Hosted platform includes fully redundant servers in a secure data center for your piece of mind.
- Your service can now have disaster recovery components so you will never miss a call.
- We deploy a cutting edge Voice Quality technology that ensures your voice calls are crisp and clear every time!

Simple

Our service runs over your existing high-speed internet connection. Your digital phones are pre-configured by sipVine's technical staff and plug into your office Ethernet connection. The only on-site equipment required is our router with our Voice Quality technology and possibly some other adapters.

We customize the configuration to how you do business!

Affordable

Your company will have unlimited local and long-distance calls at a low monthly price per user. We also offer low international and toll-free rates.

- No system administrative costs or service contracts.
- Low up-front investment; no PBX to buy!
- Term contracts are not required with sipVine.
- There are simply no hidden fees!

Hosted Solution

Our goals:

- **Minimize your up-front investment;**
- **Improve your communication functionality;**
- **Lower your administration costs; and**
- **Maximize your monthly recurring savings!**

Programmable Features

You can customize the feature set to fit your business needs and efficiency desires:

- Automated Attendant
- Voicemail/Unified Messaging
- Customized On-Hold Music
- Voicemail Notification to Cell Phone
- Holiday Greeting Schedule
- Inbound Fax to Email Boxes
- Hunt Groups
- Call Center Queues
- Dial by User Extension
- Caller ID Block
- Time of Day Routing
- Corporate Directory on Phones

Phone Features

sipVine utilizes state-of-the-art digital phones that provide the latest in phone features:

- Numerical and Name Caller ID
- Call Logs
- Call Waiting
- Three-way Ad-hoc Conferencing
- Call Park
- Call Forwarding
- Receptionist Phones
- SoftPhone on Laptop
- Headset Capable Phones
- Speakerphones
- Multiple Line Appearances
- Group Paging and Intercom

Set Your Business Free

Your phones can be used wherever high-speed internet is available – at work, home, or on the road. You can provide remote employees an office phone that has all of the functionality of the on-site phones.

As your business grows, you can add phones to your service by simply making a call to us. We'll ship them out and you'll plug them in – it's that simple!

Also, sipVine provides a meet-me conference calling feature, allowing up to 15 attendees per

conference call at no extra charge!

sipVine can deliver both the phones and the dial tone coast to coast, thus you can economize the management of your communication by centralizing your phone service under one provider. Centralization of the service and administration, coupled with unlimited local and long-distance calls, will absolutely save you money!
